  - a. In accordance with the American Dental Association's efforts to promote the art and science of dentistry and to improve the health of the general public, the MDA has established certain standards and procedures in advertising for MDA publications, internet services and any other media communications. The purpose of the MDA media forms is to improve communication among dental professionals, allied health professionals and the public. An important part of this communication is advertising that explains new and better products and services for the practice of dentistry. This advertising must be tasteful, factual, dignified and intended to provide useful product and service information. Limited commercial advertising space, not related to the practice of dentistry is also permitted within printed publications. (11/4/11)
  - b. The MDA media forms shall sell advertising space that is in accordance with the purpose of the media formats. The Association and its Council on Communications reserve the right to accept or reject advertising at its sole discretion for any product or service submitted for the publication.
  - c. Inclusion of an advertisement in the MDA media forms is not to be construed or publicized as an endorsement by the MDA of the product or service. The advertiser does not have the right to promote in its advertising claims that the product or service is approved or endorsed by the Association, unless the product or service being offered specifically includes an authorized

statement that such approval has been granted. In addition, the fact that any advertisement for a product, service or company that has appeared in the MDA media forms shall not be referred to in collateral advertising. In the interest of an ethical dental marketplace, any advertisement appearing in the MDA media forms may be challenged on its accuracy and integrity. Challenges must be submitted to the Council on Communications in writing and in a form that permits it, along with any supporting data, to be transmitted to the challenged advertiser for response. All challenges will be handled in accordance with the specific legal and advertising guidelines established by the American Dental Association.

- d. The MDA recognizes and encourages the effort put forth by advertisers to comply with the advertising policies of the Association. Understanding the tremendous effort put forth by manufacturers in developing advertising campaigns, the Association strongly encourages manufacturers and their advertisers to forward proposed advertisements in rough form, which could minimize any inconvenience caused by the review of advertising messages.
- e. Advertisers are also strongly encouraged to submit all advertising copy in rough form at least 30 days prior to the printed publication's closing date. Should the MDA editorial consideration not be completed prior to the expiration of those intervals, the advertiser or agency will be so informed.
- f. The primary benefits of MDA advertising review are for the public and the dental profession. This helps promote an open, ethical dental marketplace for advertising, thus creating authority and prestige which would not otherwise be possible. These policies are under regular review by the Association in accordance with keeping pace with the changes that occur in the dental industry and profession. It is hoped that this continuous review and evaluation procedure will improve and ensure the relevancy, timeliness, and appropriateness of the advertising content of the MDA publications, internet services and any other media communications. (The disability of any dentist shall be defined as: permanent illness and /or disability, or death.) The committee volunteer will act as liaison between the volunteer dentists and the affected practice. The volunteer administrator should be a dentist familiar with the practice and the family. The volunteer administrator should not be one of the dentists covering the practice. The volunteer administrator's main objectives shall generally include, but not be limited to:
  - a.) Provision of care for the practice's patients.
  - b.) Maintenance of maximum worth of the practice through management, patient care, and communication.
  - c.) Coordinate the workload with other volunteer dentists so that each volunteer is committed to as equal time as possible.
  - d.) Assure that conflicts of interest are avoided. An example such as choosing volunteer dentists whose practice location is in close proximity to the affected practice could be seen as a conflict of interest. In that situation, the volunteer dentist should perform only emergency care, completion of started treatment and examination of recall patients.
  - e.) Reporting to the disabled dentist or the estate regarding the status of the practice.
  - f.) Recommending to the disabled dentist or the estate regarding proper courses of action to reach the above stated goals.

No agreement, however legal and binding, will provide the services herein agreed to, but only a philosophy of mutual aid based on mutual cooperation.
  - c.) That the disabled dentist or the estate shall be responsible for any and all debt and expense connected with the operation of the practice. Likewise, the disabled dentist or the estate shall receive any and all profits created from the operation of the practice. It is understood that the operation of the

practice by the volunteer members is likely not to be as efficient as when it is administered by the owner of the practice.

d.) To personally contact his or her professional liability carrier prior to performing professional services on behalf of the practice. Each dentist volunteer agrees to have liability coverage of not less than \$300,000 during the time of performing professional services on behalf of the practice.

- 6) The disabled dentist or the estate shall have the final decision in all matters pertaining to the professional practice. It is agreed that the dentist volunteer who may be performing or supervising the performance of dentistry on behalf of a practice shall have complete control of all office operations during the time patients are being treated.
- 7) That the volunteer administrator will begin his or her duties immediately upon notification of a death or disability, and that coverage for that practice shall start not later than seven days after the request for such coverage. If the dentist or estate consists of more than one office, only the principal office shall be covered.
- 8) That, in the case of disability or death, the volunteer administrator shall coordinate coverage to extend for a period of not more than 60 days from the date of the request.
- 9) That in the event the disabled dentist or the estate desires the sale of the practice, rapid disposal of the practice will be in everyone's best interests because of the tendency for practices to decline rapidly in value under such conditions.
- 10) That the dentist volunteers requested by the volunteer administrator to serve under the terms of this agreement shall do so willingly without remuneration.
